

Lucky Ekezie

Senior Product Designer — AI Systems, Conversational UX & Voice Interface Design

✉ luckyekezie91@gmail.com  LinkedIn  portfolio

PROFILE

Senior Product Designer with 8+ years of experience designing high-impact digital products across fintech, mobility, Web3 gaming, e-commerce, and AI-driven technology. My work sits at the intersection of human-centred design and AI systems — I design products that are intuitive for users and structurally intelligent in how they integrate machine behaviour. I specialise in conversational UX, voice interface design, and AI product development, and I actively research and write about the evolving relationship between AI and product design for a global audience. Beyond client and employer work, I am building Conversa AI— an AI voice agent platform — taking it from concept through research, wireframes, high-fidelity design, and prototype. I have mentored 115+ designers globally, taught product design in underserved communities, and am an active contributor to international design discourse through UX Collective, one of the most widely read design publications in the world.

EXPERIENCE

Lead Product Designer, CliqMit

2024 – Present

Full-time from July 2025 (previously contract). Designed 0→1 event discovery and booking platform across Web, iOS, and Android.

- Launched platform to 12,000+ active users across multiple markets
- Reduced booking abandonment by 42% and increased conversions by 31% through structured UX iteration and user testing
- Designed complete design system and intelligent search filters, improving platform engagement by 25%
- Led competitive analysis across 6 major platforms to drive meaningful UX differentiation
- Directed end-to-end product design across web, iOS, and Android — maintaining design consistency across all surfaces

Lead Product Designer, Kobo Group — Kobo Vault (Fintech)

06/2025 – Present

contract role. Designing Kobo Vault — an integrated financial platform offering virtual cards, payments, savings, and AI-powered fraud monitoring. Pre-launch with active user testing underway.

- Redesigned onboarding experience, reducing drop-off from 45% to 10% and increasing user activation by 35% in testing
- Built enterprise-level design system with 80+ components, enabling 4× faster engineering delivery
- Designed instant virtual card feature — projected as a primary driver of new signups post-launch
- Designed AI fraud detection flows balancing rigorous security requirements with a frictionless user experience
- Conducted multi-country research across Nigeria, Kenya, and Ghana to shape product roadmap and prioritisation
- Improved design-to-development quality by 60% through QA frameworks and design linting processes

Lead Product Designer, CyberDogz — Web3 Gaming

11/2022 – 04/2023

Tallinn, Estonia (Remote). Redesigned the Web3 gaming experience for an established platform with 15,000+ active players.

- Increased user engagement by 40% through redesigned information architecture, navigation, and gamification systems
- Simplified wallet onboarding, improving completion rate by 35% for users new to Web3
- Built a unified design system spanning desktop, mobile, and in-game UI
- Led research with 50+ Web3 gamers to design NFT mechanics, marketplace UX, and token economy flows

Product Designer, Nugi Technologies

09/2020 – 05/2023

London, UK. Designed two flagship products shipped to market: Syncventory (retail tech) and Bosscab (mobility).

Syncventory — Inventory Management Platform

- Designed 0→1 unified inventory system integrating e-commerce, POS, and wholesale channels — currently serving retailers across multiple markets
- Built multi-store dashboard reducing stock discrepancies and improving operational decision-making for SME users
- Conducted research with 30+ retailers, translating complex inventory workflows into a clean, accessible product experience
- Featured at London Tech Week 2023 — selected as a standout product innovation in the UK retail tech space

Bosscab — Ride-Hailing Platform

- Increased ride bookings by 20% through improved discovery, matching, and booking flows
- Reduced payment failures by 45% through in-app wallet design and real-time transaction feedback
- Designed group wallet feature enabling shared ride payments — a differentiated capability for African mobility markets
- Built 50-component design system across web and mobile platforms

INDEPENDENT AI PRODUCT DEVELOPMENT

Founder & Lead Designer, Conversa AI

2024 – Present

Self-directed. Building an AI voice agent platform designed to automate business calls, customer qualification, and sales workflows for SMEs.

- Leading all product design from research through wireframes, high-fidelity design, and interactive prototype
- Designed multi-turn conversation flows, AI behaviour models, and voice UX design system with reusable conversational patterns
- Developed onboarding wizard and real-time analytics dashboard as core platform features
- Conducted research with small business owners to validate the problem space and refine product direction
- Applied to Y Combinator — demonstrating ambition to build Conversa AI to global scale

TEACHING & MENTORSHIP

Volunteer Product Design Instructor, Gadol Tech Consult

02/2026 – 05/2026

Lagos, Nigeria. Community tech school serving students from underserved neighbourhoods.

- Taught product design fundamentals, UX process, and design thinking over a 3-month programme
- Built the design curriculum from scratch — the school had no existing product design programme prior to this engagement
- All students successfully completed the programme and received certificates — publicly recognised on LinkedIn upon graduation
- Demonstrated commitment to democratising design education in communities with limited access to formal tech training

Product Design Tutor, CareerFoundry

05/2024 – 02/2026

Berlin (Remote).

- Mentored 50+ designers globally on AI design, systems thinking, and product execution
- Achieved 98% student satisfaction rating across mentored cohorts
- Delivered structured curriculum on AI UX, conversational design, design systems, and portfolio development

Independent Mentor, AI Product Design

01/2022 – Present

- Mentored 65+ designers into mid and senior roles across AI product design, fintech, and SaaS
- Led workshops on conversational AI, ethical AI design, and voice UI design patterns
- 115+ designers mentored globally across formal and independent programmes combined

WRITING & THOUGHT LEADERSHIP

- Invited by Fabricio Teixeira — founder of UX Collective, the largest design publication on Medium with 500,000+ readers — to publish work based on demonstrated quality and industry relevance

Published articles on Bootcamp (UX Collective):

- Your Product is Invisible to AI, and You Don't Even Know It — on Machine Experience (MX) Design and AI visibility in product development
- Vibe Designing: The New Way Designers Are Shipping Without a Full Team — on the emerging design-led product development movement
- The Art and Science of E-Commerce Flow: Mastering PDP, PLP, and Checkout Design — a comprehensive guide to conversion-driven e-commerce UX
- Featured guest on TecheconomyTV Podcast: "Why Product Design Matters for Startups | Lucky Ekezie's Expert Insights on UX, Growth & Innovation" — published on YouTube and LinkedIn, reaching thousands of founders and designers across Africa
- Featured in Techeconomy as a recognised voice in African technology — covering AI product strategy, startup design, and building globally competitive products from Africa
- Actively researching and writing on Machine Experience (MX) Design — the emerging discipline of designing products legible to both humans and AI systems

KEY SKILLS

- | | | |
|----------------------------------|------------------------|-----------------------------------|
| • AI Product Design | • Conversational UX | • Voice Interface Design |
| • Machine Experience (MX) Design | • LLM Integration | • Design Systems Architecture |
| • 0→1 Product Development | • Product Strategy | • UX Research & Usability Testing |
| • Information Architecture | • Interaction Design | • A/B Testing |
| • Fintech UX | • Web3 & Emerging Tech | • Mobile Design (iOS & Android) |
| • Cross-Functional Leadership | • Figma | • Prototyping |
| • Systems Thinking | | |

EDUCATION

B.A. Graphics & Advertising, <i>University of Benin</i>	2011 – 2015 Benin City, Nigeria
--	------------------------------------

CERTIFICATIONS

- | | | |
|--|---|---|
| • All of AI — ChatGPT, Midjourney, Stable Diffusion, App Development(2025) | • Design Thinking — Interaction Design Foundation(2021) | • Practical Usability — Interaction Design Foundation(2021) |
|--|---|---|

SELECTED ACHIEVEMENTS

- Launched and contributed to 7 digital products reaching 30,000+ active users across global markets
- Syncventory featured at London Tech Week 2023 — recognised as a standout retail tech innovation in the UK
- Applied to Y Combinator with Conversa AI — considered among a globally competitive applicant pool
- Invited to publish by Fabricio Teixeira, founder of UX Collective — recognition of exceptional contribution to global design discourse
- Featured guest on TecheconomyTV — one of Africa's most recognised tech media platforms — as an expert voice on product design and AI
- Mentored and taught 115+ designers and students globally, including grassroots community education in underserved areas of Lagos
- Consistently delivered measurable product impact: +20–45% conversion uplift, +30–40% engagement growth, +35% activation improvement across multiple products
- Recognised as a leading voice on AI and product design in Africa's tech ecosystem — published writer, featured speaker, and active mentor
